Professional Experience

2006-2009

Hapag-Lloyd, America

Company description:

- the 5th largest transportation company in the world
- Specialized in container imports/exports
- A leading supplier in the global door-to-door container transport industry, the company handles complex logistics packages along the transportation chain, delivering a comprehensive range of services that run the entire gamut of shipping needs

Responsibilities:

- Coordinate import and export container delivery
- Assign loads to qualified vendors for final delivery
- Coordinate, schedule and monitor rail and truck moves
- Negotiate rates with vendors
- Monitor vendor activity and performance

- Optimize delivery routes and modes of transportation
- Decide on the best transportation mode, or combination thereof of rail and truck
- Ensure customers delivery expectations are met while choosing the most cost effective delivery method
- Ensure proper cargo documentation
- Ensure DOT compliance inside U.S. as well as compliance with international guidelines and regulations
- Arrange transportation of specialized cargo such as dangerous goods, out of gage, overweight or refrigerated shipments
- Handle exclusively the U.S. Government Military Account imports and exports:

Accomplishments:

- Saved an average of \$1.5 million/year by optimizing the inland delivery routes & matching imports with exports
- Additionally generated ongoing savings of \$.7 million/year by renegotiating existing contracts with vendors
- Led the company in terms of savings generated for Hapag-Lloyd North America each year, starting with the 1st year of employment

2005-2006

Ryder Integrated Logistics

Responsibilities:

- Coordinate inbound and outbound shipments from the Ryder Distribution Center to customers
- Ensure outbound customer order accuracy for multi-stop container orders
- Ensure outbound containers max out load capacity
- Monitor inbound cargo and inventory levels
- Demand forecasting
- Safety training and compliance for loading/unloading procedures

2005

General Electric

Responsibilities:

- Support the GE Appliance Distribution Centers (ADCs) by providing coverage when needed by a Logistics Manager and by executing the following tasks:
- Combine partial truckload shipments into multi-stop truckload shipments using specialized transportation and routing software that takes into account factors such as geographical differences and mileage.
- Schedule and assign motor carriers to customer truckloads, just-in-time (JIT) cross-dock shipments, and LTL shipments.
- Act as a liaison with the ADCs and motor carrier management, communicating short-term volume estimates and meeting carrier requirements.
- Administer GE's customized service initiatives and delivery policy.
- Participate in cross-functional projects relating to Six Sigma quality initiatives in warehousing, transportation, and logistics.
- Experience exposure to all aspects of GE Consumer Product's Customer Service Team and Distribution Network
- Team Project work(Six Sigma applications)
