Exam Guidelines

1. All exams are to be submitted online, with the entire solution submitted in a MS Word document (with extension .doc). (Other formats will not be accepted.) Provide a clear summary for each problem. Selected output from software such as SAS should be copied and pasted into the MS Word document at the appropriate place. The appearance of unnecessary and irrelevant output will be penalized. Everything should be clearly labeled. Charts and tables must be formatted to appear on one page. In tables, the line must never be longer than the allowed length, resulting in a line of the table being split over two lines. All results must be presented in the write-up at the beginning. Results appearing later in the document will be treated as if they are not there. Spelling and syntax must be correct.
2. Include your SAS code at the end of the document. Never include the contents of the SAS log.
