

Protein Dataset

This data set is from Hand et al. (1994).

It lists the amount of protein consumed in nine food groups for each of 25 European countries.

It contains the character variable **country** and nine numeric variables that represent the food groups.

The food groups and their corresponding variable names are as follows:

- red meat (**RedMeat**)
- white meat (**WhiteMeat**)
- eggs (**Eggs**)
- milk (**Milk**)
- fish (**Fish**)
- cereal (**Cereal**)
- starch (**Starch**)
- nuts (**Nuts**)
- fruits and vegetables (**FruitVeg**).
